

## Prescription

This course addresses key ideas and techniques of artificial intelligence (AI). It provides a brief introduction to the history of AI and fundamental search techniques, as well as introducing important machine learning topics and algorithms with their applications, including neural networks, and addresses a selection of other important topics in AI.

## Course learning objectives

Students who pass this course should be able to:

1. Understand and explain fundamental concepts and techniques of artificial intelligence, in areas such as search, machine learning, evolutionary computing. (BE 3(a), 3(c), 3(d), 3(e)); (BSc COMP 1, 2, 3, 4).
2. Apply fundamental concepts and techniques of AI to specific problems (including engineering applications). (BE 3(a), 3(c), 3(d), 3(e), 3(f)); (BSc COMP 1, 2, 3, 4).

## Course content

2022: The course is primarily offered in-person, and there are components such as tests, labs, tutorials, and marking sessions which require in-person attendance. There will be remote alternatives for all the components of the course, but these are only available to students studying from outside the Wellington region. The remote option for tests will use a Zoom-based system for online supervision of the tests.

Students taking this course remotely must have access to a computer with camera and microphone and a reliable high speed internet connection that will support real-time video plus audio connections and screen sharing. Students must be able to use Zoom; other communication applications may also be used. A mobile phone connection only is not considered sufficient. The computer must be adequate to support the programming required by the course: almost any modern windows, macintosh, or unix laptop or desktop computer will be sufficient, but an Android or IOS tablet will not.

Artificial Intelligence (AI) is intelligence exhibited by machines. Examples include self-driving cars, automatically planning a holiday, generating sensible conversation, learning to predict fog at Wellington Airport, reading a web page to get the answer to a question, recognising handwritten digits, detecting identity by checking fingerprints, detecting network intrusions, controlling robot actuators, processing and recognising images and signals, discovering and detecting the mathematical or logical relationship between output variables and a large number of inputs in economic and engineering tasks, or optimising parameter values in complex engineering problems. COMP 307 is an introduction to the ideas and techniques that computer scientists have developed to address these kinds of tasks.

The lectures cover following main topics: search techniques, machine learning including basic learning concepts and algorithms, neural networks and evolutionary learning, reasoning under uncertainty, planning and scheduling, knowledge based systems and AI Philosophy. The course includes a substantial amount of programming. The course will cover both science and engineering applications.

# Withdrawal from Course

Withdrawal dates and process:

<https://www.wgtn.ac.nz/students/study/course-additions-withdrawals>

## Lecturers

---

### Dr Yi Mei (Coordinator)

[yi.mei@vuw.ac.nz](mailto:yi.mei@vuw.ac.nz) 04 886 5331

CO 353 Cotton Building (All Blocks), Gate 7, Kelburn Parade, Kelburn

---

### Dr Andrew Lensen

[andrew.lensen@vuw.ac.nz](mailto:andrew.lensen@vuw.ac.nz) 04 886 5336

CO 354 Cotton Building (All Blocks), Gate 7, Kelburn Parade, Kelburn

---

### Fangfang Zhang

[fangfang.zhang@vuw.ac.nz](mailto:fangfang.zhang@vuw.ac.nz)

Prof Mengjie Zhang, for some tutorials and guest lectures

Dr Fangfang Zhang for some tutorials and/or guest lectures

## Teaching Format

This course will be offered in-person and online. For students in Wellington, there will be a combination of in-person components and web/internet based resources. It will also be possible to take the course entirely online for those who cannot attend on campus, with all the components provided in-person also made available online.

During the trimester there will be typically two lectures and one tutorial per week.

## Student feedback

Student feedback on University courses may be found at:

[www.cad.vuw.ac.nz/feedback/feedback\\_display.php](http://www.cad.vuw.ac.nz/feedback/feedback_display.php)

## Dates (trimester, teaching & break dates)

- Teaching: 28 February 2022 - 03 June 2022
- Break: 11 April 2022 - 24 April 2022
- Study period: 06 June 2022 - 09 June 2022
- Exam period: 10 June 2022 - 25 June 2022

## Class Times and Room Numbers

**28 February 2022 - 10 April 2022**

- **Monday** 13:10 - 14:00 – LT205, Hugh Mackenzie, Kelburn
- **Tuesday** 13:10 - 14:00 – LT205, Hugh Mackenzie, Kelburn

- **Friday** 13:10 - 14:00 – LT205, Hugh Mackenzie, Kelburn

**25 April 2022 - 05 June 2022**

- **Monday** 13:10 - 14:00 – LT205, Hugh Mackenzie, Kelburn
- **Tuesday** 13:10 - 14:00 – LT205, Hugh Mackenzie, Kelburn
- **Friday** 13:10 - 14:00 – LT205, Hugh Mackenzie, Kelburn

## Other Classes

There will be some scheduled helpdesks.

## Set Texts and Recommended Readings

### Required

There is not required textbook for COMP307. You can learn all the course content from the lecture notes and slides.

Some online materials are available on the course website.

### Recommended

A highly recommended reading is the book: Stuart J. Russell and Peter Norvig, *Artificial Intelligence. A Modern Approach*, Prentice-Hall, NJ ([Available from Vic Books](#), or you can seek out alternate options or e-books from any publisher or supplier available to you.) A lot of content of the course is from this book.

We will also provide a reading list via the course website.

- Please see Talis.

## Mandatory Course Requirements

In addition to achieving an overall pass mark of at least 50%, students must:

- submit reasonable attempts for at least three of the four assignments, because the practical application of the range of concepts and techniques in the course to real problems, demonstrated in the assignments, is critical for meeting CLO 2.

*If you believe that exceptional circumstances may prevent you from meeting the mandatory course requirements, contact the Course Coordinator for advice as soon as possible.*

## Assessment

This course will be assessed through assignments and two tests. There will be four assignments, which will involve a combination of programming and discussions.

The marks and feedback will be returned in two weeks after the submission of each assignment.

Assessment Item	Due Date or Test Date	CLO(s)	Percentage
Assignment 1 (3-4 weeks)	Week 5	CLO: 1,2	15%
Assignment 2 (3 weeks)	Week 7	CLO: 1,2	12%
Assignment 3 (2-3 weeks)	Week 10	CLO: 1,2	10%
Assignment 4 (2 weeks)	Week 12	CLO: 1,2	8%
Test 1	Week 8	CLO: 1,2	15%
Test 2	Assessment week	CLO: 1,2	40%

## Penalties

The penalty for assignments that are handed in late without prior arrangement is one grade reduction per day. Assignments that are more than one week late will not be marked.

There are three late days for the assignments. Students can arrange these three late days among the assignments freely.

## Extensions

Individual extensions will only be granted in exceptional personal circumstances, and should be negotiated with the course coordinator before the deadline whenever possible. Documentation (eg, medical certificate) may be required.

## Submission & Return

All work should be submitted through the ECS submission system, accessible through the course web pages. Marks and comments will be returned through the ECS marking system, also available through the course web pages.

## Workload

In order to maintain satisfactory progress in COMP 307, you should plan to spend an average of 10 hours per week on this course. A plausible and approximate breakdown for these hours would be:

- Lectures and tutorials: 3 hours
- Readings, revision/review, and assignments: 7 hours

If assignments are left until the last minute, the amount of work spent in particular weeks may vary greatly.

## Teaching Plan

Lecture schedules can be seen from the course website. See [https://ecs.wgtn.ac.nz/Courses/COMP307\\_2022T1/LectureSchedule](https://ecs.wgtn.ac.nz/Courses/COMP307_2022T1/LectureSchedule)

## Communication of Additional Information

1. Course website: [https://ecs.wgtn.ac.nz/Courses/COMP307\\_2022T1/](https://ecs.wgtn.ac.nz/Courses/COMP307_2022T1/)

2. Course forum
3. Email sent by the lecturers to students at their ecs email addresses.
