Prescription

An introduction to the range of mathematical techniques employed by engineers, including functions, calculus, linear algebra, vector geometry, set theory, logic and probability. There is an emphasis on applications and modelling.

Course learning objectives

Students who pass this course should be able to:

1. Read, interpret and manipulate mathematical expressions and equations in a variety of contexts.
2. Apply mathematical concepts and techniques to analyse engineering systems and solve engineering problems.
3. Demonstrate mastery of a range of fundamental mathematical techniques.
4. Creatively and collaboratively combine skills and knowledge from mathematics, physics, computing and engineering to model an engineering problem.

Course content

The course is primarily offered in-person, and the tests will require in-person attendance for all students in the Wellington region. There will also be a remote option and there will be online alternatives for all the components of the course for students who cannot attend in-person.

Students taking this course remotely must have access to a computer with camera and microphone and a reliable high speed internet connection that will support real-time video plus audio connections and screen sharing. Students must be able to use Zoom; other communication applications may also be used. A mobile phone connection only is not considered sufficient. The computer must be adequate to support the programming required by the course: almost any modern windows, Macintosh, or Unix laptop or desktop computer will be sufficient, but an Android or IOS tablet will not.

If the assessment of the course includes tests, the tests will generally be run in-person on the Kelburn campus. There will be a remote option for students who cannot attend in-person and who have a strong justification (for example, being enrolled from overseas).

The remote test option will use Zoom for online supervision of the tests, and you must be able to use Zoom with a camera, microphone, and screen-sharing. Students who will need to use the remote test option must contact the course coordinator in the first two weeks to get permission and make arrangements.

Topics covered in this course include: sets, number, functions, logic, algebraic techniques, trig functions, sequences, series, limits, differentiation, integration, vectors, matrix algebra and probability.

Required Academic Background

In 2021-2022, 12 credits of NCEA Level 3 in Mathematics/Statistics (or equivalent) will be

accepted for entry, due to disruptions to teaching, learning and assessment caused by COVID-19.

Withdrawal from Course

Withdrawal dates and process:
https://www.wgtn.ac.nz/students/study/course-additions-withdrawals

Lecturers

Dr Tanya Gvozdeva (Coordinator)

tanya.gvozdeva@vuw.ac.nz

CO 362 Cotton Building (All Blocks), Gate 7, Kelburn Parade, Kelburn

Dr Dillon Mayhew

dillon.mayhew@vuw.ac.nz   04 463 5155

CO 435 Cotton Building (All Blocks), Gate 7, Kelburn Parade, Kelburn

Dr Howard Lukefahr

howard.lukefahr@vuw.ac.nz   04 886 5630

CO 341 Cotton Building (All Blocks), Gate 7, Kelburn Parade, Kelburn

Teaching Format

Four lectures, one tutorial, and one two-hour lab most weeks. Lectures are recorded to video and available to students through BlackBoard.

Student feedback

Feedback from previous students is available at
http://www.cad.vuw.ac.nz/feedback/feedback_display.php

Dates (trimester, teaching & break dates)

- Teaching: 11 July 2022 - 14 October 2022
- Break: 22 August 2022 - 04 September 2022
- Study period: 17 October 2022 - 20 October 2022
- Exam period: 21 October 2022 - 12 November 2022

Class Times and Room Numbers

11 July 2022 - 21 August 2022
- **Monday** 11:00 - 11:50 – LT220, Murphy, Kelburn
- **Tuesday** 11:00 - 11:50 – LT220, Murphy, Kelburn
- **Wednesday** 11:00 - 11:50 – LT220, Murphy, Kelburn
- **Friday** 11:00 - 11:50 – LT220, Murphy, Kelburn

05 September 2022 - 16 October 2022

- **Monday** 11:00 - 11:50 – LT220, Murphy, Kelburn
- **Tuesday** 11:00 - 11:50 – LT220, Murphy, Kelburn
- **Wednesday** 11:00 - 11:50 – LT220, Murphy, Kelburn
- **Friday** 11:00 - 11:50 – LT220, Murphy, Kelburn

Other Classes

A two-hour lab each week, for four of the weeks available.

One-hour tutorial almost every week. There are no tutorials in week 1 and week 7.

Set Texts and Recommended Readings

Required

There is no set text for this course. Detailed typeset lecture notes are made available online in the Home Pages.

Recommended

There is no set text for this course, but we follow Croft et al, the recommended text, very closely. It is also the text for ENGR 122, and can be purchased from [Vic Books](#). Stroud's book is also recommended if students want to read further.

- *Engineering Mathematics: a Foundation for Electronic, Electrical, Communications and Systems Engineers*, 4th edition or later, by Anthony Croft, Robert Davison, Martin Hargreaves and James Flint, Pearson, 2012 or later.
- *Engineering Mathematics*, by K.A. Stroud, with Dexter J. Booth. Palgrave MacMillan, London.

Mandatory Course Requirements

There are no mandatory course requirements for this course.

If you believe that exceptional circumstances may prevent you from meeting the mandatory course requirements, contact the Course Coordinator for advice as soon as possible.

Assessment

This course is assessed through a combination of assignments, test, exam and lab reports. In order to gain maximum marks, it is highly recommended students attempt all assessments.

This assessment information is subject to change.

Assessment Item	Due Date or Test Date	CLO(s)	Percentage
Diagnostic quiz	See website	CLO: 1,2,3,4	1%
Weekly quizzes (12)	Every week	CLO: 1,2,3,4	4%
Assignments (8)	Most Weeks	CLO: 1,2,3,4	20%
Lab Reports (4)	See website	CLO: 1,2,3,4	20%
Tests	See website	CLO: 1,2,3,4	25%
Exam	See website	CLO: 1,2,3,4	30%

Penalties

Late assignments will not be marked. You can miss up to two (out of eight) assignments without losing any credit.

Late lab reports will result in lost marks, 10% loss for each day up to five days late. Later reports will not be marked.

Any plagiarism is likely to result in zero marks for both parties.

Extensions

Extensions can be granted in exceptional cases. All extension requests should be submitted through ECS extension system.

Submission & Return

All lab reports and assignments are submitted through the ECS online system, accessed through the ENGR 121 home pages.

Labs, asssignments,test results and feedback are all posted on the ECS online system.

Marking Criteria

All assignments will be marked fully. You will be provided with a marking schedule which you should check against your marked work.

Workload

In order to maintain satisfactory progress in ENGR 121, plan to spend about eleven hours a week during lecture times. One breakdown of this would be four hours in lectures, two hours in labs, one hour in a tutorial, two hours writing reports and assignments, and two hours reading and reviewing notes and tuts.

Teaching Plan

Communication of Additional Information

The course homepages on the web are the primary source of additional information. There will be links

to these from Blackboard and from ECS and SMS course list web pages. Lectures will be recorded to video, available from the next day through Blackboard.

Offering CRN: 31158

Points: 15
Prerequisites: 16 AS credits NCEA Level 3 Mathematics (or equivalent) or MATH 132;
Restrictions: Any pair (MATH 141/QUAN 111, MATH 151/161/177)
Duration: 11 July 2022 - 13 November 2022
Starts: Trimester 2
Campus: Kelburn
