

## Prescription

This course introduces a range of different energy generation systems, and especially those that utilise renewable resources: wind energy (pumping and power), geothermal, hydro (at different scales), solar photovoltaic, solar thermal, and bioenergy. For each technology, the theoretical underpinning is examined – for example, optical physics to harness solar radiation in concentrating solar systems – and the engineering approaches to identify and design efficiency improvements for such systems are established.

## Course learning objectives

Students who pass this course should be able to:

1. Describe advanced, integrated renewable energy generation solutions for given problems.
2. Analyse the sustainability and efficiencies of the generation technology systems.
3. Critically review energy generation technologies to identify efficiency gains that can be achieved.
4. Design an efficiency improvement to energy generation.

## Course content

This course is offered in-person and online - for lectures, laboratories and tutorials. The tests will be undertaken online via Blackboard.

Students taking this course remotely from outside the Wellington region must have access to a computer with camera and microphone and a reliable high speed internet connection that will support real-time video plus audio connections and screen sharing. Students must be able to use Zoom; other communication applications may also be used. A mobile phone connection only is not considered sufficient. The computer must be adequate to support the practical work required by the course: almost any modern windows, macintosh, or unix laptop or desktop computer will be sufficient, but an Android or IOS tablet will not.

## Withdrawal from Course

Withdrawal dates and process:

<https://www.wgtn.ac.nz/students/study/course-additions-withdrawals>

## Lecturers

---

**Prof Alan Brent (Coordinator)**

alan.brent@vuw.ac.nz 04 463 5960

AM 413 Alan Macdiarmid Building, Gate 7, Kelburn Parade, Kelburn

---

## Dr Jim Hinkley

jim.hinkley@vuw.ac.nz 04 463 5515

AM 227 Alan Macdiarmid Building, Gate 7, Kelburn Parade, Kelburn

## Teaching Format

Weekly lectures, tutorials, laboratory sessions, and individual assignments. Practical work will involve the analysis of different generation systems. Project work will entail the technical design and demonstration of efficiency improvements.

## Student feedback

Student feedback on University courses may be found at: [www.cad.vuw.ac.nz/feedback/feedback\\_display.php](http://www.cad.vuw.ac.nz/feedback/feedback_display.php)

## Dates (trimester, teaching & break dates)

- Teaching: 28 February 2022 - 03 June 2022
- Break: 11 April 2022 - 24 April 2022
- Study period: 06 June 2022 - 09 June 2022
- Exam period: 10 June 2022 - 25 June 2022

## Class Times and Room Numbers

### 28 February 2022 - 10 April 2022

- **Tuesday** 10:00 - 10:50 – 407, Alan MacDiarmid Building, Kelburn
- **Wednesday** 10:00 - 10:50 – 407, Alan MacDiarmid Building, Kelburn
- **Friday** 10:00 - 10:50 – 407, Alan MacDiarmid Building, Kelburn

### 25 April 2022 - 05 June 2022

- **Tuesday** 10:00 - 10:50 – 407, Alan MacDiarmid Building, Kelburn
- **Wednesday** 10:00 - 10:50 – 407, Alan MacDiarmid Building, Kelburn
- **Friday** 10:00 - 10:50 – 407, Alan MacDiarmid Building, Kelburn

## Other Classes

Additional resources, to support lectures, will be provided on Blackboard.

## Set Texts and Recommended Readings

### Required

There are no required texts for this offering.

# Mandatory Course Requirements

In addition to achieving an overall pass mark of at least 50%, students must:

- Achieve a grade of at least 40% for the tests and assignments.

*If you believe that exceptional circumstances may prevent you from meeting the mandatory course requirements, contact the Course Coordinator for advice as soon as possible.*

## Assessment

The assessments will involve laboratories and tutorials, two individual assignments and two online tests.

Assessment Item	Due Date or Test Date	CLO(s)	Percentage
Efficiency analysis assignment with a 1000-word report (20 hours total)	TBC	CLO: 1,2	25%
Laboratory/tutorial exercises with one-page reports (12 hours)	TBC	CLO: 3	10%
Design assignment with a 1000-word report (20 hours)	TBC	CLO: 3,4	25%
Two tests (2 hours each)	TBC	CLO: 1,2,3	40%

## Penalties

Late submissions will be subject to a penalty of 10% per day for 4 days. No work will be accepted after this unless previously arranged with the Course Coordinator.

## Extensions

Individual extensions will only be granted in exceptional personal circumstances, and requests should be made to the Course Coordinator before the assessment deadline whenever possible. Documentation (e.g. a medical certificate) may be required.

## Submission & Return

Assignments are to be submitted via Blackboard, where feedback will be provided.

## Workload

The student workload for this course is 150 hours.

## Teaching Plan

The teaching plan will be made available on commencement of the course via Blackboard.

# Communication of Additional Information

The main means of communication outside of lectures will be via Blackboard.
