

Prescription

This course is concerned with the development of correct software, especially the use of formal requirements and specifications to develop high-integrity software. This has applications in several areas, such as safety-critical systems (e.g. commercial airliners, space systems, etc) and high-performance concurrent systems. The course will examine a range of principles and techniques which underpin a rigorous approach to the specification and implementation of software. A sequence of assignments and labs will see a range of tools being used to specify small software systems, and to check that they meet their requirements. NB: this course is first running in 2019.

Course learning objectives

Students who pass this course will be able to:

1. Explain what it means for a system to be correct, what engineering techniques we can use to increase confidence in correctness, and why this is important.
2. Use formal structures such as sets, functions, relations and sequences to model software systems.
3. Use formal notations to specify desired properties of software systems, such as assertions, pre and postconditions, variants, and invariants.
4. Use formal tools to check that systems correctly implement their desired properties.
5. Use formal reasoning to explain why a particular system is correct with respect to a specification.

Withdrawal from Course

Withdrawal dates and process:

<https://www.wgtn.ac.nz/students/study/course-additions-withdrawals>

Lecturers

James Noble (Coordinator)

James.Noble@vuw.ac.nz 04 4636736

234 Cotton, Kelburn

David Streader

david.streader@vuw.ac.nz 04 4635655

260 Cotton, Kelburn

Teaching Format

SWEN324 will have a one week break in week 9, 19-27 September 2020. There will be no lectures or

assessment items due during this week.

This course will be offered in-person and online. For students in Wellington, there will be a combination of in-person components and web/internet based resources. It will also be possible to take the course entirely online for those who cannot attend on campus, with all the components provided in-person also made available online.

Student feedback

Student feedback on University courses may be found at:
www.cad.vuw.ac.nz/feedback/feedback_display.php

Dates (trimester, teaching & break dates)

- Teaching: 13 July 2020 - 18 October 2020
- Break: 17 August 2020 - 30 August 2020
- Exam period: 19 October 2020 - 25 October 2020

Class Times and Room Numbers

13 July 2020 - 16 August 2020

- **Tuesday** 13:10 - 14:00 – LT206, Easterfield, Kelburn
- **Wednesday** 13:10 - 14:00 – LT206, Easterfield, Kelburn

31 August 2020 - 18 October 2020

- **Tuesday** 13:10 - 14:00 – LT206, Easterfield, Kelburn
- **Wednesday** 13:10 - 14:00 – LT206, Easterfield, Kelburn

Other Classes

All course materials will be available on-line (such as readings or videos or recordings). Class lectures will discuss and explain that content, and will also be recorded.

Set Texts and Recommended Readings

Required

The course will use the textbook *Program Proofs*, K. Rustan M. Leino. KRML256. 24 June 2020.

In 2020 students can access this text free of charge, under the condition that they do not distribute the text further.

Recommended

There are many books available, some online. There are many lecture notes, tutorials, etc online. See the course web site for recommendations.

Mandatory Course Requirements

There are no mandatory course requirements for this course.

If you believe that exceptional circumstances may prevent you from meeting the mandatory course requirements, contact the Course Coordinator for advice as soon as possible.

Assessment

Assessment Item	Due Date or Test Date	CLO(s)	Percentage
Weekly Overview Questions	Weekly	CLO: 2,3,4	25%
Assignment 1	30 July 2020	CLO: 1,2,3,4,5	15%
Assignment 2	27 August 2020	CLO: 1,2,3,4,5	15%
Assignment 3	17 September 2020	CLO: 1,2,3,4,5	15%
Assignment 4	24 October 2020	CLO: 1,2,3,4,5	30%

Penalties

Specific penalties for each item of work will be listed with the requirements for that work item.

Extensions

You will have 6 "slip days" that are managed by the ECS submission system. You do not need to apply for these - any slip days you have left will be automatically applied to assignments that you submit late.

Marks for assessment items submitted more than three slip days late (without an extension) may be delayed, and may be marked pass/fail without feedback.

If you have significant medical or personal issues that may affect your ability to submit an assignment on time, contact the course organiser to discuss an extension. You may need documentation for significant cases.

Submission & Return

All assignments must be submitted via the ECS submission system. Marks and comments will be returned via the ECS marking system.

Marking Criteria

Marking criteria will be provided with each assessment item.

Group Work

There is no group work in this course

Peer Assessment

There is no peer assessment in this course.

Workload

The expected workload for the course is about 10 hours per week. This includes the lectures, tutorial, assignment and reading/study time

Teaching Plan
