GOALS FOR 2023?

WORK EXPERIENCE OPPORTUNITIES

- Start a CV – it will get easier!
- Learn about jobs through: Summer of Tech, Direct from company websites, SEEK, LinkedIn, recruiters
- Join relevant clubs and professional associations
- Start networking with intent
- Look for a mentor.

STUDY PRIORITIES

- Learn deeply & procrastinate wisely
- Grades can be important for your first job especially
- Take courses to help you learn about core security concepts: networking, operating systems, databases, APIs, mobile devices, IoT, AI, deception technology, vulnerability management, risk assessments, privacy and security regulations
- Start to build your future professional network at uni.

CYBER CAREER TIMELINE

2023	2024	2025	2026
<p>Earning some stripes</p> <p>Take cyber security courses and relevant IT courses, but also use online tools and tutorials. Build a lab and learn to hack.</p>	<p>Work experience</p> <p>You've learnt some good skills, so put them to use. Could you get an internship, or maybe some tutoring work? mentor your grandma or grandpa? Maybe help your auntie with her website security?</p>	<p>Internship</p> <p>Of course you will be studying and nailing those assignments and exams, but you'll shoot for a cyber internship.</p>	<p>Full time permanent role</p> <p>After all the hard work you now have the career in cyber security. Time to celebrate!</p>

THANK YOU
