### Integration by parts

$$\int u \left( \frac{dv}{dx} \right) dx = uv - \int \left( \frac{du}{dx} \right) v dx$$

#### Derivative Rules:

**Product Rule:** if  $y = uv$ , then  $y' = u'v + uv'$

**Quotient Rule:** if  $y = u/v$ , then

$$y' = \frac{(vu' - uv')}{v^2}$$

**Chain Rule:** if  $y = y(z)$  and  $z = z(x)$ , then

$$\frac{dy}{dx} = \frac{dy}{dz} \frac{dz}{dx}$$
