
Our first java program

COMP 102

Victoria University of Wellington

Hello World

- Hello World, a simple program that write Hello World to the screen
 - so that we know Java works and we can develop programs
- We will
 - Use BlueJ, the Integrated Development Environment (IDE) that we will use to write code
 - Write the first piece of code
 - Compile (change it from human readable code, to machine runnable code) and run the code
 - See how it looks when there is an error
- BlueJ is an IDE for Java
 - Class manager, for keeping track of the files in your program
 - Editor for entering and modifying the program
 - Built-in compiler interface to help compile and fix the syntax errors
 - Special interface to make it easy to construct objects and call methods on them.
