

Special Topic: Computer Game Development - Course Outline

COMP 348: 2010 Trimester 1

This document sets out the workload and assessment requirements for COMP 348. It also provides contact information for staff involved in the course. If the contents of this document are altered during the course, you will be advised of the change by an announcement in lectures and/or on the course web site. A printed copy of this document is held in the School Office.

The course is co-taught with SWEN439 and DESN 385.

Objectives

By the end of the course, students should be able to:

1. Understand the range of design skills and activities required to develop computer games, and be able to interact knowledgably with experts with skills complementary to their own.
2. Understand and be able to apply a variety of programming and software engineering techniques to the design and implementation of computer games.
3. Be able to use integrated game development tools to build interactive computer games.
4. Be able to work in a team with designers from other disciplines to design, develop, and evaluate an interactive computer game.

Lectures, Tutorials, Laboratories, and Practical work

A [schedule](#) of lecture topics, readings, and assignment due dates will be available online. The first five weeks will cover a range of important topics in game development that will be needed for your group project. The final seven weeks will address a variety of topics in game development.

Lectures for COMP 348 are: Wednesday 9:30-12:30 in WIG401 (in the School of Architecture and Design, Vivian Street). These lectures will involve formal lectures, practical tutorials, presentations, and meetings, and will be shared with SWEN 439 and DESN 385.

A Lab/Tutorial for COMP 348 and SWEN 439 will be held Thursdays 4-6pm in CO 431 in the first part of the course. It is strongly recommended that you attend them.

Texts and Readings

There are no assigned texts for the course. There will be a list of readings and other resources that you may find helpful, and some Game Development books will be placed on closed reserve in the library.

Assignments and Projects

There will be four assignments and projects for COMP348.

- An individual project to give you practice in the skills of using Blender to create, animate, and control characters in a 3D game world. It addresses the first three objectives of the course.
- A proposal for a game. The class, together with the staff, will select the five best proposals for groups to work on in the second project. The game proposal will not contribute to the assessment for COMP/SWEN students.
- A group project to design a 3D game and implement a "Proof of Concept". Each group will consist of three COMP/SWEN students and three DESN students. It addresses all the objectives of the course. The project will require a group presentation, group submission of a game, and individual reports on the project.
- An essay based on your reading. It addresses the first two objectives of the course.

The details of the assignments and projects will be available at [Assignments](#), along with intermediate deadlines for components of the projects.

The final deadlines for the assignments and projects are:

- Game proposal: 20 March
- Project 1: 21st April.
- Essay: 27 May.
- Group Project presentation: 23-25th June
- Group Project submission and individual reports: 28th June.

[Note that the deadlines for the group project are during the examination period and will be somewhat negotiable if you have other exams at the same time.]

Workload

In order to maintain satisfactory progress in COMP 348, you should plan to spend a minimum of 10 hours per week on this course; A plausible and approximate breakdown for these hours would be:

- Lectures and tutorials: 5 hours in first 5 weeks; 3 hrs for rest of the course.
- Independent and group work on assignments: 5 hours in first 5 weeks; 7 hrs for the remaining teaching weeks, 10 hrs for the non-teaching weeks of the course.

School of Engineering and Computer Science

The School office is located on level three of the Cotton Building ([Cotton 358](#)).

Staff

The course organiser for COMP 348 is [Peter Andrae](#). The other lecturers attached to COMP 348 are [Stuart Marshall](#) and [James Noble](#). Kah Chan will be organising and lecturing DESN385 and Doug Easterly will also contribute. Their contact details are:

- Peter Andrae
- [Cotton 429](#)
- +64 4 463 5834
- Peter.Andrae@ecs.vuw.ac.nz

- Stuart Marshall
- [Cotton 261](#)
- +64 4 463 6730
- Stuart.Marshall@ecs.vuw.ac.nz

- James Noble
- [Cotton 234](#)
- +64 4 463 6736
- James.Noble@ecs.vuw.ac.nz

- Kah Chan
- Room 4.05 Wigan St
- +64 4 463 6278
- Kah.Chan@vuw.ac.nz

- Doug Easterly
- Room 411 Wigan St
- +64 4 463 6204
- Doug.Easterly@vuw.ac.nz

Several staff at [Sidhe Interactive](#) will also be contributing to the course.

Announcements and Communication

The main means of communication outside of lectures will be the COMP 348 web area at http://ecs.victoria.ac.nz/Courses/COMP348_2010T1/. There you will find, among other things, this document, the [lecture schedule](#) and [assignment handouts](#), and the [COMP 348 Forum](#). The forum is a web-based bulletin board system. Questions, answers, and comments can be posted to the forum, and staff will read these posts and frequently respond to them.

Practical Work

The practical work for the individual and group projects will be done using Blender, which runs on windows, macintosh, and unix. You will be using macintosh labs in the school of architecture and in Cotton 431. You may also use your own computers or the other computers in the ECS labs. Blender is available for free, and can be downloaded from <http://www.blender.org>.

Assessment

Late submission will incur a penalty of 20% per day, unless previously negotiated.

Your grade for COMP 348 will be determined based on the following assessment weightings:

Item	Weight
Project 1	35%
Essay	15%
Group Project: group mark	15%
Group Project: individual report	35%

Tests and Exams

There are no tests or examinations for this course, but the group presentations for your group project will be scheduled during the examination period as if they were an exam.

Plagiarism

Working Together and Plagiarism

We encourage you to discuss the principles of the course and assignments with other students, and to help and seek help with the development tools. The group project will involve substantial collaboration. However, any work you present as your own individual work must be accomplished by you; any work presented as the work of the group must be accomplished by members of the group. It is essential that you give appropriate credit to part of the work that came from any other sources (whether other students in the course or outside).

The [School policy on Plagiarism](#) (claiming other people's work as your own) is available from the course home page. Please read it. We will penalise anyone we find plagiarising, whether from students currently doing the course, or from other sources. If you have had help from someone else (other than a tutor), it is always safe to state the help that you got.

Mandatory Requirements

1. Submit a Game Proposal
2. Submit project 1.
3. Contribute effectively to the group project. Students who do not participate in or contribute to their group project will fail the course.

Passing COMP 348

To pass COMP 348, a student must satisfy mandatory requirements and gain at least a **C** grade overall.

Withdrawal

The last date for withdrawal from COMP 348 with entitlement to a refund of tuition fees is Fri 12 March 2010. The last date for withdrawal without being regarded as having failed the course is Fri 14 May 2010 -- though later withdrawals may be approved by the Dean in special circumstances.

Rules & Policies

Find key dates, explanations of grades and other useful information at <http://www.victoria.ac.nz/home/study>.

Find out about academic progress and restricted enrolment at <http://www.victoria.ac.nz/home/study/academic-progress>.

The University's statutes and policies are available at <http://www.victoria.ac.nz/home/about/policy>, except qualification statutes, which are available via the Calendar webpage at <http://www.victoria.ac.nz/home/study/calendar> (See Section C).

Further information about the University's academic processes can be found on the website of the Assistant Vice-Chancellor (Academic) at <http://www.victoria.ac.nz/home/about/avcacademic>

Expectations of Students in ECS courses

The School of Engineering and Computer Science strives to anticipate all problems associated with its courses, laboratories and equipment. We hope you will find that your courses meet your expectations of a quality learning experience.

If you think we have overlooked something or would like to make a suggestion feel free to talk to your course organiser or lecturer.
