

Database System Engineering - Course Outline

SWEN 304: 2016 Trimester 2

The course outline is not yet audited and is subject to change.

This document sets out the workload and assessment requirements for SWEN 304. It also provides contact information for staff involved in the course. If the contents of this document are altered during the course, you will be advised of the change by an announcement in lectures and/or on the course web site. A printed copy of this document is held in the School Office.

SWEN 304 develops ability to solve practical software engineering problems in designing, developing, and maintaining databases. Its primary focus is on relational databases and their database management systems (DBMS). The topics covered by SWEN 304 include the theory of the relational data model, the structured query language (SQL), query optimization, database design using the entity relationship (ER) data model and normalization, and database transaction processing.

Objectives

By the end of the course, students should be able to:

1. Demonstrate understanding of the principles of database systems generally and the relational database model specifically;
2. Set up, query, and update a relational database using interactive SQL;
3. Design stored procedures and triggers in a relational database system;
4. Set up, query, and update a relational database using a transaction program written in Java;
5. Explain the basic principles and common trade-offs in designing a relational database, and to design it;
6. Explain the basic principles and common trade-offs in relational database query optimization;
7. Explain the basic principles of database concurrency control and recovery, and implement them within a transaction program.

Objective 1 demonstrates the ability to apply mathematical and engineering sciences to a software engineering problem ([BE graduate attribute 3\(a\)](#)).

Objectives 2, 3, 4, and 7 develop the ability to synthesize efficient solutions to complex engineering problems ([BE graduate attribute 3\(b\)](#)).

Objective 5 develops competence in database design, understanding of the limitations of database design methods, and a recognition when further information is needed for solving the problem ([BE graduate attribute 3\(f\)](#), [BE graduate attribute 3\(e\)](#), and [BE graduate attribute 3\(d\)](#)), respectively.

Objective 6 develops ability to solve models that predict behaviour of an engineering system ([BE graduate attribute 3\(c\)](#)).

Textbook

The textbook for SWEN 304 is: R. Elmasri and S. Navathe, *Fundamentals of Database Systems; 6th edition*, Pearson/Addison Wesley, 2014.

Lectures, Tutorials, Laboratories, and Practical work

For 2016, trimester 2 begins on 11th of July. The mid-trimester lecture break is from 22th of August to the 4th of September.

A [schedule](#) of lecture topics, readings, and assignment due dates is available online

Lectures for SWEN 304 are:

Day	Time	Where
Monday	16:10 -- 17:00	HM LT002
Wednesday	16:10 -- 17:00	HM LT002
Thursday	16:10 -- 17:00	HM LT002

Some lecture times will be used for tutorials, as shown in the lecture schedule.

There are no additional timetabled laboratories in SWEN 304. There will be helpdesk available for the projects and assignments. The helpdesk hours will be announced (check the [Time Table](#)).

Workload

In order to maintain satisfactory progress in SWEN 304, you should plan to spend an average of at least 10-12 hours per week on this paper, which includes attending lectures, solving homework assignments, doing practical work, additional reading, and reviewing lecture material.

School of Engineering and Computer Science

The School office is located on level three of the Cotton Building ([Cotton 358](#)).

Staff

The lecturer for SWEN 304 and their contact details are:

- [Hui Ma](#) (course organiser)
- [CO259](#)
- +64 4 463 5657
- hui.ma@ecs.vuw.ac.nz

- [Bing Xue](#)
- [CO352](#)
- +64 4 463 5542
- bing.xue@ecs.vuw.ac.nz

- [Alexandre Sawczuk da Silva](#)
- [CO254](#)
- sawczualex@ecs.vuw.ac.nz

The SWEN 304 Tutors are:

- Alexandre Sawczuk da Silva (email: sawczualex@ecs.vuw.ac.nz)

- Hoai Bach Nguyen (email: nguyenhoai2@ecs.vuw.ac.nz)

- Qi Chen (email: Qi.Chen@ecs.vuw.ac.nz)

- Ewan Moshi (email: moshiewan@myvuw.ac.nz)

Class representative: Donald Tang: tangdona@myvuw.ac.nz

Announcements and Communication

The main means of communication outside of lectures will be the SWEN 304 web area at http://ecs.victoria.ac.nz/Courses/SWEN304_2016T2/. There you will find, among other things, this document, the [lecture schedule](#) and [assignment handouts](#), and the [SWEN 304 Forum](#). The forum is a web-based bulletin board system. Questions and comments can be posted to the forum, and staff will read these posts and frequently respond to them.

Assessment

Your grade for SWEN 304 will be determined based on the following assessment weightings (and tentative dates):

Item	Weight	Hand out	Due
Assignment 1	5%	Week 2	Week 4
Assignment 2	5%	Week 5	Week 7
Assignment 3	5%	Week 6	Week 8
Assignment 4	5%	Week 8	Week 11
Project 1	10%	Week 4	Week 6
Project 2	10%	Week 10	Week 12
Final Examination	60%		

Unless otherwise instructed, Assignments may be submitted via the SWEN 304 assignment box on level 2 of the Cotton Building or the School's electronic submission system, and projects should be submitted via the electronic submission system.

Any assignment or project submitted after the due date will be penalized at the rate of 5% per day (a weekend counts as one day). Approval to submit assignments and projects late without penalty will only be granted in exceptional circumstances and if the arrangement is made prior to the due date. Any medical excuse must be accompanied by a doctor's certificate.

Exam

The timetable for final examinations will be available from the University web site and will be posted on a notice board outside the faculty office. The final examination will be three hours long. No computers, electronic calculators or similar device will be allowed in the final examination. Paper non-English to English dictionaries will be permitted. The examination period for trimester 2 is 21 October - 12 November.

Plagiarism

Working Together and Plagiarism

We encourage you to discuss the principles of the course and assignments with other students, to help and seek help with programming details, problems involving the lab machines. However, any work you hand in must be your own work.

The School policy on Plagiarism (claiming other people's work as your own) is available from the course home page. Please read it. We will penalise anyone we find plagiarising, whether from students currently doing the course, or from other sources. Students who knowingly allow other students to copy their work may also be penalised. If you have had help from someone else (other than a tutor), it is always safe to state the help that you got. For example, if you had help from someone else in writing a component of your code, it is not plagiarism as long as you state (eg, as a comment in the code) who helped you in writing the method.

Mandatory Course Requirements

To pass SWEN 304 a student must achieve at least 40% of all marks for projects and assignments.

Passing SWEN 304

To pass SWEN 304, a student must satisfy mandatory requirements, achieve at least a D grade for the final examination, and gain at least a **C-** grade overall.

Withdrawal

The last date for withdrawal from SWEN 304 with entitlement to a refund of tuition fees is Friday 22 July 2016. The last date for withdrawal without being regarded as having failed the course is Friday 23 September 2016 -- though later withdrawals may be approved by the Dean in special circumstances.

Rules & Policies

Find key dates, explanations of grades and other useful information at <http://www.victoria.ac.nz/home/study>.

Find out about academic progress and restricted enrolment at <http://www.victoria.ac.nz/home/study/academic-progress>.

The University's statutes and policies are available at <http://www.victoria.ac.nz/home/about/policy>, except qualification statutes, which are available via the Calendar webpage at <http://www.victoria.ac.nz/home/study/calendar> (See Section C).

Further information about the University's academic processes can be found on the website of the Assistant Vice-Chancellor (Academic) at <http://www.victoria.ac.nz/home/about/avcacademic>

All students are expected to be familiar with the following regulations and policies, which are available from the school web site:
